**SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT**

Sir:

Pursuant to 37 C.F.R. §§ 1.56, 1.97 and 1.98, Applicant hereby submits a Supplemental Information Disclosure Statement along with a Request for Continued Examination and Petition to Withdraw the Application From Issue.

An Office Action from the Japanese Patent Office was issued from co-pending Japanese Application No. 2006-551007 (now published as 2007-520955). Applicant's undersigned attorney (Anthony G. Fussner) was not aware of this Japanese Office Action until first becoming aware of the same today (June 21, 2010) upon receiving a letter from the foreign associate responsible for the prosecution of the co-pending Japanese patent application 2006-551007.

The Office Action cites only two documents, specifically, Japanese Laid-Open Patent Publication H11-068456 and Japanese Laid-Open Patent Publication H08-

Serial No. 10/597,192

**JUN 21 2010**

186404. The instant application and co-pending Japanese patent application No. 2006-551007 both claim priority to Sweden application No. 0400203-6 (Issued as SE0400203-6, now abandoned). The attached Form 1449 lists Japanese Laid-Open Patent Publication H11-068456 and Japanese Laid-Open Patent Publication H08-186404. Applicant also provides copies of these two Japanese Laid-Open Patent Publications H11-068456 and H08-186404, along with their free English translations from [http://www.ipdl.inpit.go.jp/homepg\\_e.ipdl](http://www.ipdl.inpit.go.jp/homepg_e.ipdl). Applicant makes no representation or guarantee as to the accuracy of these English translations.

Also for the USPTO's convenience only, Applicant now provides an English translation of the rejections in the Japanese Office Action from Japanese Application No. 2006-551007. Claims 1-5 and 10-12 of Japanese patent application 2006-551007 have been rejected due to lack of inventive step over Japanese Laid-Open Patent Publication H11-068456, which discloses a surface mounting antenna comprising a frequency switching means with a diode, by which a plurality of resonance frequencies are obtained. Claims 2 and 6-8 of Japanese patent application 2006-551007 have been rejected due to lack of inventive step over Japanese Laid-Open Patent Publications H11-068456 and H08-186404 on the grounds that claims 2 and 6-8 are usually used well known technology in the art as described in Japanese Laid-Open Patent Publications H11-068456 and H08-186404. Claim 9 of Japanese patent application 2006-551007 is not rejected at present. Applicant, however, does not necessarily agree with or acquiesce in these rejections from the Japanese patent office.

Applicant believes that the correct fees (\$130 Petition Fee under 37 C.F.R. § 1.17(h) and \$810 RCE fee under 37 C.F.R. § 1.17(e)) have been included with this filing. If Applicant owes any additional fee(s), the Commissioner is hereby authorized to charge the fee(s) to Deposit Account No. 08-0750. In addition, if there is ever any other fee deficiency or overpayment under 37 C.F.R. § 1.16 or 1.17 in connection with this patent application, the Commissioner is hereby authorized to charge such deficiency or overpayment to Deposit Account No. 08-0750. In addition, Applicants hereby request the United States Patent & Trademark Office treat any concurrent or future reply requiring a petition for extension of time pursuant to §1.136 for its timely submission as

incorporating therein a petition for an extension of time for the appropriate length of time and authorizes the Commissioner to charge all required extension of time fees that have not otherwise been paid to Deposit Account No. 08-0750.

Respectfully submitted,

/Anthony G. Fussner/
